                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               밁
                                                                                                            CC kit to perform the method, an array, a method for identifying an agent that increases or decreases the expression of the polynucleotide sequence that is differentially expressed in neuronal tissue of a first animal CC subjected to pain, a method for identifying a compound which regulates CC the expressed in an animal subjected to pain, a method for identifying a compound which regulates CC compound that regulates the activity of one or more of the CC polynucleotides, a method for producing a pharmaceutical composition, a cc method for identifying a compound or small molecule that regulates the CC method for identifying a compound which is differentially composition, a method for identifying a compound useful in treating compound that regulates the cc activity in an animal of one or more of the polypoptides given in the composition, a method for identifying a compound useful in treating compain and a pharmaceutical composition comprising the one or more complicates or their antibodies. The polypucleotide or the compound that composition in the compound that composition in the compound constriction compain (e.g. spinal segmental nerve injury (Chung), chronic constriction conjury (CCI) and spared nerve injury (SNI) in an animal (e.g. gene conjury (CCI) and spared nerve injury (SNI) in an animal (e.g. gene cc the specification) which is differentially expressed during pain. Note: The sequence data for this patent did not form part of the printed conjury in the printed conjuration of the printed conjuration of the printed at the conjuration of the printed at the conjuration of the printed 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               or human polynucleotides or a polynucleotide which represents a fragmer derivative or allelic variation of the nucleic acid sequence. Also claimed are a vector comprising the novel polynucleotide, a host cell comprising the vector, a method for identifying a nucleotide sequence which is differentially regulated in an animal subjected to pain and a which is differentially regulated in an animal subjected to pain and a
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           New composition comprising two or more isolated polypeptides, useful for preparing a medicament for treating pain in an animal.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  14-AUG-2001; 2001US-0312147P.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

SOFTWARE: PatentIn Release #1.0, Version #1.30
CURRENT APPLICATION DATA;
APPLICATION UNMBER: US/08/849,303
FILING DATE: 21-MAY-1997
CLASSIFICATION UNMBER: 514
ATTORNEY/AGENT INFORMATION:
NAME: Jackson Esq., David A.
REGISTRATION UNMBER: 52,742
REFERENCE/DOCKET NUMBER: 53,742
REFERENCE/DOCKET NUMBER: 53,742
REFERENCE/DOCKET NUMBER: 1321-1-003
TELECOMMUNICATION INFORMATION:
TELEPHONE: 201-487-5800
TELEPAX: 201-341-1644
TELEPAX: 201-341-1644
TELEPAX: 13521
INFORMATION FOR SEQ ID NO: 15:
SEQUENCE CHARACTERISTICS:
LENGTH: 139 amino acid
STRANDEDNESS: single
TYPE: amino acid
STRANDEDNESS: single
TYPE: monico acid
STRANDEDNESS: single
TYPE: protein

SUBCELLULAR LOCATION: Secreted.
TISSUE SPECIFICITY: Proximal caput region of the epididymis. Lower expression in the testis. Within the testis it is localized to the elongating spermatids, whereas within the epididymis it is exclusively synthesized by the proximal caput epithelium.
INDUCTION: Testicular factors or hormones other than androgens present in the testicular fluid may be involved in the regulation of CRES gene expression.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         s SWISS-PROT entry is copyright. TISSUE SPECIFICITY: Proximal caput region of the epididymis. Lower expression in the testis. Within the testis it is localized to the elongating spermatids, whereas within the epididymis it is exclusively synthesized by the proximal caput epithelium.

SIMILARITY: Belongs to the cystatin family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          maturation.

"The structures of native phosphorylated chicken cystatin and of a
recombinant unphosphorylated variant in solution.";
J. Mol. Biol. 234:1048-1059(1993).
-I-FUNCTION: This protein binds tightly to and inhibits a variety
thiol proteases including ficin, papain, and cathepsins B, C, H
and L. Although isolated from egg white, it is also present in
                                                                                                                                                                                                                                                                                                                                                                                                                        Brzin J., Kos J., Turk V.;
